

Daily Report 6

Date: 1th of March

Topics of the day

Our special topic for this week is:

Is detailed hydrological analysis justified or needed for the 1994 event and analysis for future event?

We planned a strategy for the work of the next week:

- First we will deal with the analysis tasks (Tuesday):
 - MikeSHE : finish reporting (*Morgan and José*)
 - ISIS : running of model, adapting cross-sections including the flood and try to add a structures analysis (influence of removal of weirs) (*Evert, Roland and Amine*)
 - Mike11 : reporting previous work done, adapting cross-sections including the flood and try to add a structures analysis (influence of removal of weirs) (*Thai, Albert Guido and Masato*)
 - Mike21 : link with Mike11, running of model, reporting (*Gonzalo, Poh Hoon and José*)
- After that, we will put our full attention to the special topic and the reporting. (Wednesday and Thursday):

We had a first brainstorm on our special topic. Tomorrow after lunch another brainstorming and specific division of tasks on the special topic will be done.
